DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2,4, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakai (JP 05083911 A).

Regarding claim 1, Sakai discloses a brushless motor comprising a rotor having a magnet (8) with an axial length of LM and a stator having a stator core (1) provided with a plurality of teeth (4) arranged peripherally vis-à-vis said magnet with an air gap interposed between them and said magnet and having auxiliary grooves (5) formed at the front ends thereof, the axial length Ls of said stator core being greater than the axial length LM of said magnet ($L_s > L_M$).

Regarding claim 2, Sakai discloses said stator core is provided with overhanging portions thereof that are not vis-à-vis the magnet but axially outstanding from the respective axial ends of the magnet.

Regarding claim 4, Sakai discloses the center of each of said auxiliary grooves of each of said teeth is located on a radial line prolonged from the corresponding circumferential end face of the teeth.

Regarding claim 6, Sakai discloses adapted to be used as drive source of an electric power steering device (intend of used no patentability weight).

Allowable Subject Matter

3. Claims 3 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
